

Management Recommendations

Planting	Plant at 2.5-2.75" deep. Plant as soon as conditions allow. Very good cold tolerance and emergence. Plant at normal population for the area. Excellent for no-till.
Early Season	Handles early season dry weather well. It will stay healthy while waiting for rain. Will respond to additional N sidedressing. Canopies quickly due to wider leaf and flatter style canopy.
Mid-Season	Silks and pollinates well under stress. No need to apply fungicide. Will respond to late-applied N if the season supports more investment in the crop.
Late Season	Healthy late into the season. Dark green.
Harvest	Good standability late into the fall. Dries down well. Good plant health late in the fall. Dent hybrid.

Placement Recommendations

Heavy Soils	8 Very Good
Medium Soils	8 Very Good
Light Soils	8 Very Good
Poorly Drained	8 Very Good
Dryland Performance	8 Very Good
Irrigated Performance	9 Excellent
Corn after Corn	8 Very Good
Late Planting	8 Very Good
High Population	8 Very Good
Low Population	7 Good
Foliar Fungicide Response	3 Fair
Northern Corn Leaf Blight	7 Good
Gray Leaf Spot	7 Good
Common Rust	7 Good
Goss's Wilt	8 Very Good
Anthraxnose Stalk Rot	7 Good
Tar Spot	Data Not Available

Etna is a high-yielding, tough-as-nails, ultra early product!

Characteristics

Flowering for Maturity	Early	Cold Tolerance	9 Excellent
Grainfill Period	Long	Heat Tolerance	8 Very Good
Plant Height (in)	90	Drought Tolerance	8 Excellent
Ear Height (in)	35	Native Insect Tolerance	6 Good
Ear Flex	Great	Greensnap	8 Very Good
Ear Length (in)	7	Root Quality	8 Very Good
Ear Girth	Girthy	Stalk Quality	8 Very Good
Kernel Rows	14-18	Fall Appearance	9 Excellent
Cob Color	Red	Staygreen	8 Very Good
Husk Cover	Medium	Drydown	7 Good
Emergence/Early Vigor	9 Excellent	Testweight	8 Very Good
