

### Management Recommendations

<b>Planting</b>	Plant at 2.5-2.75" deep. Plant as soon as conditions allow. Very good cold tolerance and emergence. Plant at normal populations for the area; can push the population to above average if there is sufficient moisture and nutrients. Excellent for no-till.
<b>Early Season</b>	Handles early season dry weather well. It will stay healthy while waiting for rain. Will respond to additional N sidedressing. Canopies quickly due to wider leaf and flatter style canopy. Darker green.
<b>Mid-Season</b>	Silks and pollinates well under stress. No need to apply fungicide. Will respond to late-applied N if the season supports more investment in the crop.
<b>Late Season</b>	Healthy late into the season. Dark green. Strongly rooted hybrid.
<b>Harvest</b>	Stands well. Dries down slow due to excellent plant health late into the fall. Plan to harvest later. High quality grain with candy corn look. Dent hybrid.

### Placement Recommendations

<b>Heavy Soils</b>	8 Very Good
<b>Medium Soils</b>	8 Very Good
<b>Light Soils</b>	9 Excellent
<b>Poorly Drained</b>	8 Very Good
<b>Dryland Performance</b>	9 Excellent
<b>Irrigated Performance</b>	9 Excellent
<b>Corn after Corn</b>	9 Excellent
<b>Late Planting</b>	7 Good
<b>High Population</b>	7 Good
<b>Low Population</b>	7 Good
<b>Foliar Fungicide Response</b>	1 Not Recommended
<b>Northern Corn Leaf Blight</b>	7 Good
<b>Gray Leaf Spot</b>	7 Good
<b>Common Rust</b>	7 Good
<b>Goss's Wilt</b>	9 Excellent
<b>Anthraxnose Stalk Rot</b>	7 Good
<b>Tar Spot</b>	Data Not Available

**Brand new early genetics. Aliya is a very strong early hybrid with good cold and drought tolerance. Excellent for short season areas.**

### Characteristics

<b>Flowering for Maturity</b>	Early	<b>Cold Tolerance</b>	9 Excellent
<b>Grainfill Period</b>	Long	<b>Heat Tolerance</b>	8 Very Good
<b>Plant Height (in)</b>	90	<b>Drought Tolerance</b>	8 Excellent
<b>Ear Height (in)</b>	36	<b>Native Insect Tolerance</b>	8 Excellent
<b>Ear Flex</b>	Great	<b>Greensnap</b>	8 Very Good
<b>Ear Length (in)</b>	7	<b>Root Quality</b>	8 Very Good
<b>Ear Girth</b>	Girthy	<b>Stalk Quality</b>	7 Good
<b>Kernel Rows</b>	14-18	<b>Fall Appearance</b>	9 Excellent
<b>Cob Color</b>	Red	<b>Staygreen</b>	9 Excellent
<b>Husk Cover</b>	Medium	<b>Drydown</b>	5 Average
<b>Emergence/Early Vigor</b>	9 Excellent	<b>Testweight</b>	9 Excellent
