

81 RM

Recommended Uses: Grain

## Management Recommendations

<b>Planting</b>	Plant 2.5-2.75" deep as soon as conditions allow. Very good cold tolerance and emergence. Plant at normal populations for the area. Excellent for no-till.
<b>Early Season</b>	Dark green. A shorter plant with very upright leaves--row shading could be an issue in rows wider than 30" or at very low populations. Handles dry weather well.
<b>Mid-Season</b>	Silks and pollinates well under stress. Will respond to side-dressed nitrogen if seasonal weather supports the application.
<b>Late Season</b>	Healthy late into the season. Will dry down. Shorter stature.
<b>Harvest</b>	Stands and waits for the combine, but must be harvested before a major snow event. Good test weight.

## Placement Recommendations

<b>Heavy Soils</b>	9 Excellent
<b>Medium Soils</b>	9 Excellent
<b>Light Soils</b>	9 Excellent
<b>Poorly Drained</b>	8 Very Good
<b>Dryland Performance</b>	9 Excellent
<b>Irrigated Performance</b>	8 Very Good
<b>Corn after Corn</b>	8 Very Good
<b>Late Planting</b>	7 Good
<b>High Population</b>	7 Good
<b>Low Population</b>	8 Very Good
<b>Foliar Fungicide Response</b>	7 Good
<b>Northern Corn Leaf Blight</b>	7 Good
<b>Gray Leaf Spot</b>	7 Good
<b>Common Rust</b>	7 Good
<b>Goss's Wilt</b>	8 Very Good
<b>Anthraxnose Stalk Rot</b>	7 Good
<b>Tar Spot</b>	Data Not Available

**If you plant this maturity, you need Rosario!**

## Characteristics
