

# Tess

92 RM

Recommended Uses: Grain, Silage

## Management Recommendations

|                     |   |
|---------------------|---|
| <b>Planting</b>     | Works well following wheat, soybeans, and corn. All tillage systems. Plant early and 2.5-2.75" deep in all crop management systems. Fast emergence and early growth. Very good for narrow rows. Can be used in 20-36" rows. |
| <b>Early Season</b> | Upright leaf takes a bit of time to get to canopy. The plant does grow rapidly.   |
| <b>Mid-Season</b>   | Can respond positively to fungicides each year, but fungicide is not required. Flowers a bit later for maturity.  |
| <b>Late Season</b>  | Stands well and has good health into harvest. Does start to dry down earlier than our other products. Ear flexes well. Great silage choice.   |
| <b>Harvest</b>      | Excellent test weight. Will wait for the combine. Dries fast.   |

## Placement Recommendations

|                                  |                    |
|----------------------------------|--------------------|
| <b>Heavy Soils</b>               | 9 Excellent        |
| <b>Medium Soils</b>              | 9 Excellent        |
| <b>Light Soils</b>               | 9 Excellent        |
| <b>Poorly Drained</b>            | 7 Good             |
| <b>Dryland Performance</b>       | 7 Good             |
| <b>Irrigated Performance</b>     | 9 Excellent        |
| <b>Corn after Corn</b>           | 7 Good             |
| <b>Late Planting</b>             | 5 Average          |
| <b>High Population</b>           | 9 Excellent        |
| <b>Low Population</b>            | 9 Excellent        |
| <b>Foliar Fungicide Response</b> | 9 Excellent        |
| <b>Northern Corn Leaf Blight</b> | 7 Good             |
| <b>Gray Leaf Spot</b>            | 7 Good             |
| <b>Common Rust</b>               | 7 Good             |
| <b>Goss's Wilt</b>               | 7 Good             |
| <b>Anthraxnose Stalk Rot</b>     | 7 Good             |
| <b>Tar Spot</b>                  | Data Not Available |

**Tess is a tough, high yielding hybrid with consistent performance across management systems.**

## Characteristics

|                               |         |                                |                    |
|-------------------------------|---------|--------------------------------|--------------------|
| <b>Flowering for Maturity</b> | Late    | <b>Cold Tolerance</b>          | 7 Good             |
| <b>Grainfill Period</b>       | Short   | <b>Heat Tolerance</b>          | 7 Good             |
| <b>Plant Height (in)</b>      | 106     | <b>Drought Tolerance</b>       | 7 Very Good        |
| <b>Ear Height (in)</b>        | 42      | <b>Native Insect Tolerance</b> | 4 Industry Average |
| <b>Ear Flex</b>               | Great   | <b>Greensnap</b>               | 7 Good             |
| <b>Ear Length (in)</b>        | 8       | <b>Root Quality</b>            | 7 Good             |
| <b>Ear Girth</b>              | Average | <b>Stalk Quality</b>           | 7 Good             |
| <b>Kernel Rows</b>            | 16-18   | <b>Fall Appearance</b>         | 7 Good             |
| <b>Cob Color</b>              | Red     | <b>Staygreen</b>               | 7 Good             |
| <b>Husk Cover</b>             | Medium  | <b>Drydown</b>                 | 7 Good             |
| <b>Emergence/Early Vigor</b>  | 7 Good  | <b>Testweight</b>              | 5 Average          |
