

Scarlett

103 RM

Recommended Uses: Grain, Silage

Management Recommendations

Planting	Plant 2.25-3" deep. Can plant early. No rotational preferences. Can be planted con on corn. Use standard planting populations per your area.
Early Season	Strong early-season growth with fast emergence and vigor.
Mid-Season	Medium-tall hybrid. Medium to darker green. Wide leaves with semi-upright orientation.
Late Season	Develops a large root system. Fungicides are not required. Has a strong health package.
Harvest	Provides high-quality forage and grain for livestock. Excellent flex acre hybrid choice.

Placement Recommendations

Heavy Soils	8 Very Good
Medium Soils	9 Excellent
Light Soils	8 Very Good
Poorly Drained	8 Very Good
Dryland Performance	8 Very Good
Irrigated Performance	8 Very Good
Corn after Corn	8 Very Good
Late Planting	7 Good
High Population	7 Good
Low Population	7 Good
Foliar Fungicide Response	2 Minimal
Northern Corn Leaf Blight	8 Very Good
Gray Leaf Spot	8 Very Good
Common Rust	5 Average
Goss's Wilt	8 Very Good
Anthraxnose Stalk Rot	8 Very Good
Tar Spot	8 Very Good

Scarlett is a great choice for regenerative farming!

Characteristics

Flowering for Maturity	Average	Cold Tolerance	8 Very Good
Grainfill Period	Average	Heat Tolerance	9 Excellent
Plant Height (in)	103	Drought Tolerance	7 Very Good
Ear Height (in)	43	Native Insect Tolerance	6 Good
Ear Flex	Some	Greensnap	7 Good
Ear Length (in)	9	Root Quality	8 Very Good
Ear Girth	Average	Stalk Quality	8 Very Good
Kernel Rows	16-18	Fall Appearance	9 Excellent
Cob Color	Red	Staygreen	8 Very Good
Husk Cover	Medium	Drydown	5 Average
Emergence/Early Vigor	8 Very Good	Testweight	7 Good
