

# Xena

105 RM

Recommended Uses: Grain, Silage

## Management Recommendations

<b>Planting</b>	Plant 2.25" - 3" deep. Can plant early. Not rotation sensitive - corn on corn is fine.
<b>Early Season</b>	Very fast emergence with early vigor. A lot of plant material quickly.
<b>Mid-Season</b>	Taller hybrid that flowers appropriately for maturity.
<b>Late Season</b>	Generally healthy all season long. Silage harvest is earlier than you may think. Cut some samples to test while husks are green to know whole plant moisture.
<b>Harvest</b>	Solid dry down for grain harvest.

## Placement Recommendations

<b>Heavy Soils</b>	7 Good
<b>Medium Soils</b>	8 Very Good
<b>Light Soils</b>	8 Very Good
<b>Poorly Drained</b>	7 Good
<b>Dryland Performance</b>	7 Good
<b>Irrigated Performance</b>	8 Very Good
<b>Corn after Corn</b>	8 Very Good
<b>Late Planting</b>	8 Very Good
<b>High Population</b>	8 Very Good
<b>Low Population</b>	7 Good
<b>Foliar Fungicide Response</b>	2 Minimal
<b>Northern Corn Leaf Blight</b>	7 Good
<b>Gray Leaf Spot</b>	7 Good
<b>Common Rust</b>	7 Good
<b>Goss's Wilt</b>	Data Not Available
<b>Anthraxnose Stalk Rot</b>	7 Good
<b>Tar Spot</b>	Data Not Available

**Xena is a great grain and silage hybrid. An excellent flex acre choice!**

## Characteristics

<b>Flowering for Maturity</b>	Average	<b>Cold Tolerance</b>	9 Excellent
<b>Grainfill Period</b>	Average	<b>Heat Tolerance</b>	9 Excellent
<b>Plant Height (in)</b>		<b>Drought Tolerance</b>	7 Very Good
<b>Ear Height (in)</b>		<b>Native Insect Tolerance</b>	4 Industry Average
<b>Ear Flex</b>	Great	<b>Greensnap</b>	7 Good
<b>Ear Length (in)</b>		<b>Root Quality</b>	9 Excellent
<b>Ear Girth</b>		<b>Stalk Quality</b>	9 Excellent
<b>Kernel Rows</b>		<b>Fall Appearance</b>	8 Very Good
<b>Cob Color</b>	Red	<b>Staygreen</b>	8 Very Good
<b>Husk Cover</b>	Tight	<b>Drydown</b>	8 Very Good
<b>Emergence/Early Vigor</b>	9 Excellent	<b>Testweight</b>	7 Good
