

Janet

110 RM

Recommended Uses: Grain, Silage

Management Recommendations

Planting	Plant at medium high populations in higher yield environments and medium populations in lower yield environments. Western starting recommendations are 23-30,000 ppa dryland and 28-36,000 ppa irrigated. Works well after corn, soybeans, and wheat. Works well for no till.
Early Season	Average emergence and early season growth.
Mid-Season	Leaf disease tolerance is good, however could benefit from fungicide application. Susceptible to Tar Spot.
Late Season	Good stalk and roots. Maintains very good late season health and plant intactness. Excellent grain and silage hybrid. Fast grainfill.
Harvest	Stands well into harvest. Girthy, flex ears with very good test weight. Fast drydown.

Placement Recommendations

Heavy Soils	9 Excellent
Medium Soils	9 Excellent
Light Soils	7 Good
Poorly Drained	7 Good
Dryland Performance	7 Good
Irrigated Performance	9 Excellent
Corn after Corn	9 Excellent
Late Planting	5 Average
High Population	8 Very Good
Low Population	7 Good
Foliar Fungicide Response	7 Good
Northern Corn Leaf Blight	9 Excellent
Gray Leaf Spot	9 Excellent
Common Rust	9 Excellent
Goss's Wilt	6 Above Average
Anthrachnose Stalk Rot	7 Good
Tar Spot	2 Poor

Janet is a very strong yielding grain hybrid with excellent silage utility.

Characteristics

Flowering for Maturity	Average	Cold Tolerance	6 Above Average
Grainfill Period	Average	Heat Tolerance	7 Good
Plant Height (in)	112	Drought Tolerance	7 Very Good
Ear Height (in)	50	Native Insect Tolerance	5 Above Average
Ear Flex	Great	Greensnap	5 Average
Ear Length (in)	9	Root Quality	8 Very Good
Ear Girth	Girthy	Stalk Quality	8 Very Good
Kernel Rows	16-18	Fall Appearance	8 Very Good
Cob Color	Red	Staygreen	7 Good
Husk Cover	Medium	Drydown	5 Average
Emergence/Early Vigor	6 Above	Testweight	7 Good
