

Dutchess

108 RM

Recommended Uses: Grain, Silage, High-Moisture Corn

Management Recommendations

Planting	Plant at average plant populations under adequate moisture. We like 14-22,000 dryland in dry areas and 26-28,000 under irrigation with low capacity wells. Handles light to medium soils best soils best. Does not like wet feet. Best suited west.
Early Season	Strong early season emergence and growth. Likes a lot of sunshine. More upright leaf structure.
Mid-Season	Disease tolerance is strong, but will respond to foliar fungicide. Handles heat and drought well.
Late Season	Stays healthy to the end of the season. Very tall, robust plants. Good silage option.
Harvest	Girthy ears with good grain quality for animal feed. High yield potential in drier conditions.

Placement Recommendations

Clay Soils	7 Good
Loamy Soils	7 Good
Sandy Soils	7 Good
Poorly Drained	4 Below Average
Dryland Performance	8 Very Good
Irrigated Performance	7 Good
Corn after Corn	7 Good
Late Planting	6 Above Average
High Population	7 Good
Low Population	8 Very Good
Foliar Fungicide	5 Sometimes Needed
NCLB	7 Good
Gray Leaf Spot	7 Good
Common Rust	7 Good
Goss's Wilt	9 Excellent
Anthracoese Stalk Rot	7 Good
Tar Spot	6 Above Average

Very good dual purpose choice!

Characteristics

Flowering for Maturity	Average	Cold Tolerance	7 Good
Grainfill Period	Average	Heat Tolerance	7 Good
Plant Height (in)	116	Drought Tolerance	8 Excellent
Ear Height (in)	46	Native Insect Tolerance	6 Good
Ear Flex	Great	Greensnap	7 Good
Ear Length (in)	9	Root Quality	7 Good
Ear Girth	Girthy	Stalk Quality	7 Good
Kernel Rows	18-20	Fall Appearance	8 Very Good
Cob Color	Pink	Staygreen	7 Good
Husk Cover	Medium	Drydown	7 Good
Emergence/Early Vigor	7 Good	Testweight	6 Above Average
