

Zelda

95 RM

Recommended Uses: Silage

Management Recommendations

Planting	Do not plant more than 28,000 ppa, especially in 30" rows. Works in all types of tillage systems. Strong in corn on corn rotations.
Early Season	Strong emergence and fast early growth.
Mid-Season	Has good disease tolerance, but can consider foliar fungicide application if symptoms appear.
Late Season	Big. Very dense canopy; minimal light penetration to the soil. Stands well.
Harvest	Maintains health for longer chopping window. Thick canopy with good ground shading. High tonnage with very good quality.

Placement Recommendations

Clay Soils	7 Good
Loamy Soils	9 Excellent
Sandy Soils	8 Very Good
Poorly Drained	7 Good
Dryland Performance	9 Excellent
Irrigated Performance	7 Good
Corn after Corn	9 Excellent
Late Planting	7 Good
High Population	2 Poor
Low Population	9 Excellent
Foliar Fungicide	7 Rarely Needed
NCLB	9 Excellent
Gray Leaf Spot	7 Good
Common Rust	7 Good
Goss's Wilt	9 Excellent
Anthracoese Stalk Rot	7 Good
Tar Spot	Data Not Available

Zelda is a strong silage choice across a range of conditions.

Characteristics

Flowering for Maturity	Late	Cold Tolerance	8 Very Good
Grainfill Period	Short	Heat Tolerance	9 Excellent
Plant Height (in)	119	Drought Tolerance	9 Durayield
Ear Height (in)	44	Native Insect Tolerance	7 Very Good
Ear Flex	Great	Greensnap	7 Good
Ear Length (in)	8	Root Quality	5 Average
Ear Girth	Average	Stalk Quality	7 Good
Kernel Rows	14-16	Fall Appearance	9 Excellent
Cob Color	Red	Staygreen	9 Excellent
Husk Cover	Medium	Drydown	Not Applicable
Emergence/Early Vigor	8 Very Good	Testweight	Not Applicable
